#### MONEY EASIER AND COPPERS IN DEMAND

James A. Pollock & Co., bankers and trokers, furnish the following, received over their private wire yesterday after-

over their private wire yesterday afternoon:
Paine, Webber & Co., Boston-The
comparative case in money over last day
of the year was very encouraging and the
buying of stocks was good all through
the list. In the local market Granby
was notably strong, closing at 72 bid,
Range showed a rally of 2 points and
North Butte I point. Although there is
not much rally from low prices sentiment
has changed very much for the better
and it is very hard to find any found
lots of conpers offered anywhere near
resent prices. The vear closes with the
level of prices low and the price of conper high, and we think that the early
months of 1912 will show very much higher range all through the list.
Logan & Bryan, New York-Despite
the gloom which has long prevalled in
financial circles, sentiment as the vear
closes appeared to be a slade more
cheerful, though, perhaps the same was
induced in great part by the approach
of the holiday. However, advices from
the other side in connection with the
peace conference were somewhat more in
keeping with constructive hopes, though
it is admitted on all sides that it will,
perhaps take some weeks at the carillest
to adjust the existing differences between
Turky and the Balkan states.

The fact that a somewhat lower renewal rate was established today than
had been anticipated doubtless contributed to the hetter feeling, as did the
sattered evening up of accounts and the

satterin great part being induced by the
strength in copper metal on the other
side and by the repeat of the reservative course in the stock market is
advisable, as events in January likely to

reservative course in the stock market is
advisable, as events in January likely to
be of vast and critical importance in the
reservative founds trust will be resumed and plans for much refunding and
new financing probably will be formulated.

PLISINESS IS DIIII CHICAGO. Dec. 31.—Prospects of enlarged European demand, with little surplus in sight except west of the Rockies,
tended today to lift the wheat market
here. Closing prices were steady at a
new advance of &c to a cent. Handsome
export clearances, 1,52,666 bushels, for
the day, had much to do with wheat
strength.
Indisposition of short sellers to carry
open trades into another year helped prevent any important setback in wheat
Prolonged dry weather southwest and absence of snow covering had a discourseing effect on the brair, the only weakness
of the sension, just at the start, having
been mainly due to favorable weather in
Argentina.

December wheat entire the contraction. December wheat options expired without unusual feature except a sudden upward jerk of 1; in the last fifteen minutes. May, the leading month, ranged of
from 914 \$11c to 91c, with final sales is
in net higher at 21]c.
Liquidation of December holdings
formed the principal activity in the corn
pit. May closed at 4516 483c. Cash is
grades were tirm.
Outs as a rule showed firmness in consequence of buying on the part of a goodsized short interest. May closed at 322 to
\$22cc.

Packers kept the provision market on a steady keel. At the windup quota-tions were within 5c either way from last night's level. Open. High. Low. Close. 86 874 86 874 914 918 914 915 884 894 885 874

#### BUSINESS IS DULL IN NUMEROUS LINES

Eastern advices are that business already has slowed up in numerous lines of activity, the difference between the boom following the late harvest of crops and the present being too pronounced to be concealed. The main trouble is the ecarcity of money, a condition especially felt by the stock exchanges as the speculator and investor were unable to secure the funds needed.

It appears that the American interests were unable to draw upon their large foreign credits, as this might have precipitated more drastic liquidation of

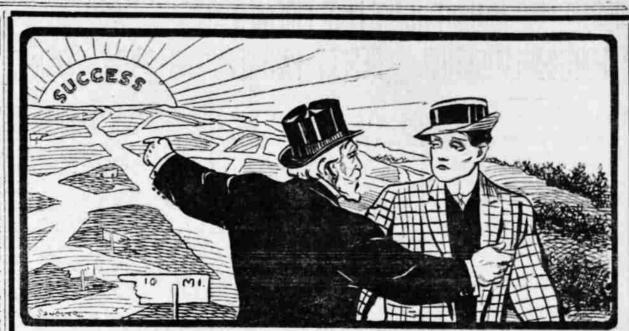

large foreign credits, as this might have precipitated more drastic liquidation of foreign held American securities than has been experienced already. The foreign monetary situation has been extremely unsatisfactory, but the Tuesday advices seemed agreed that money was considerably easier.
